Job Title: Entry-Level Software Engineer
Department: Early Career Engineering
Location: Denver, CO / Hybrid

About the Role:
We are hiring entry-level software developers eager to learn, write clean code, and contribute to production services.

Responsibilities:
- Write well-tested code in Python or JavaScript.
- Collaborate on software components, participate in pull request reviews, and debug issues.
- Learn modern cloud engineering best practices under senior engineer guidance.

Must-Have Requirements:
- Proficiency in Python or JavaScript fundamentals.
- Practical experience with Git version control and GitHub workflow.
- Minimum 0.5 years of hands-on software development experience (internships, academic projects, or co-ops).
- Bachelor's degree in Computer Science, Software Engineering, or related technical discipline.

Nice-to-Have Requirements:
- Familiarity with Linux terminal environments.
- Basic understanding of Docker containers.
