Location: Seattle, WA

PROFESSIONAL SUMMARY
Senior Backend Engineer with over 5 years of experience building high-throughput REST and GraphQL microservices using

TECHNICAL SKILLS
- Programming Languages: Python, Go, SQL
- Frameworks & Libraries: FastAPI, Pydantic, SQLAlchemy, Alembic
- Databases & Storage: PostgreSQL, Redis, Elasticsearch
- Cloud & Infrastructure: Docker, Kubernetes, AWS (S3, ECS), Git, CI/CD

PROFESSIONAL EXPERIENCE

Senior Backend Engineer | CloudScale Systems Inc.
January 2021 · Present (3.5 years)
- Architected and deployed microservices using Python 3.11 and FastAPI handling 15,000 requests per second.
- Optimized PostgreSQL relational queries, indexing, and partitioning, cutting p95 query latency by 45%.
- Implemented multi-region Redis caching layer to offload high-volume read traffic from primary database.
- Containerized all internal services using Docker multi-stage builds and automated CI/CD deployments.

Backend Software Engineer | DataStream Tech
June 2019 · December 2020 (1.5 years)
- Built resilient RESTful APIs in Python using FastAPI and PostgreSQL for enterprise telemetry collection.
- Maintained Docker compose development environments and orchestrated automated unit and integration tests.
- Designed schema migrations using Alembic across PostgreSQL clusters.

EDUCATION
Bachelor of Science in Computer Science
University of Washington | Graduated May 2019

CERTIFICATIONS
- AWS Certified Developer · Associate (2022)
